Key to pot sizes:

- The #1, #2, #3 etc. pot sizes are commonly referred to as 1 gallon, 2 gallon, etc. But their actual volume is less.
- D1, D2, and D4 refers to three sizes of band pots, from smallest to largest.
- Treepots are tall, deep pots too long to ship, but great for oaks. STP for small treepots, LTP for large.
- BASK refers to a wire basket, ideal for root systems of Eucalyptus. In 2 sizes, roughly equivalent to #2 and #3 pots.
