RETAIL/SPECIMEN PLANT LIST

Fall 2024 (prices good through winter 2024)

Pot sizes and availability are subject to change, since we keep potting small plants into larger pots, and some items sell out.

Key to pot sizes:

- The #1, #2, #3 etc. pot sizes are commonly referred to as 1 gallon, 2 gallon, etc. But their actual volume is less.
- D1, D2, and D4 refers to three sizes of band pots, from smallest to largest.
- Treepots are tall, deep pots too long to ship, but great for oaks. STP for small treepots, LTP for large.
- BASK refers to a wire basket, ideal for root systems of Eucalyptus. In 2 sizes, roughly equivalent to #2 and #3 pots.
